

COP28 Health Pavilion

Hosted by the World Health Organization on behalf of the health community

Synergies and trade-offs in climate neutral and healthy cities – How to combine adaptation and mitigation measures

December 6, 17:00 – 18:15 (local time Dubai)

Cities are particularly vulnerable to climate change impacts and at the same time central for mitigation efforts. In this event, research experts and practitioners discuss how successful mitigation and adaptation actions improve the health of people living in cities.
